Continuation of 5. does NOT place the application in condition for allowance because: the arguments and amendments do not overcome the prior art cited. 1. The USC 112 is not overcome for claim 25. The examiner interprets the claim as a UDP server communicating with a TCP/IP radio modem - UDP does not communicate directly with TCP, they are two completely different protocols, change is required. The applicant argues that claims 1-38 are non-obvious since direct communication is possible and are therefore novel over prior art cited - the examiner disagrees since Lawrence teaches a mobile to obtain location of another mobile(s) via wired/wireless phone and that emai capable phones would provide similar capability (while via an email server, this reads on the claim since a wireless phone must transmit via a BTS/MSC). The steps "a" thru "I" are disclosed by the prior art cited since Shah teaches observing multiple field crew personnel and Lawrence teaches any phone being able to contact another (eg. multiple people) and email capability would support the steps as well. The examiner is not swayed by the argument regarding Lawrence's wired phone not being a wireless phone (eg. the examiner interprets wired/wireless phones as reading on each other and are therefore interchangeable). The examiner is not swayed by the use of position data comprising Lat/Long, velocity and direction since the prior art cited provides means for determining/calculating each to a certain exactness. AFTER FURTHER REVIEW, THE EXAMINER NOW OBJECTS TO CLAIMS 16, 22, 23 and 35.
